RULING ON ENTITLEMENT¹

On January 6, 2021, Angel Thompson filed a petition² for compensation under the National Vaccine Injury Compensation Program, 42 U.S.C. §300aa-10, *et seq.*³ (the “Vaccine Act”). Petitioner alleges that she suffered a shoulder injury related to vaccine administration (SIRVA) after receiving an influenza (flu) vaccination on October 6, 2020. Amended Petition at 1. Petitioner further alleges that the vaccination was administered within the United States, her symptoms lasted at least six months, and that she has never received compensation in the form of an award or settlement or filed a civil suit for her

vaccine-related injury. Petition at 1, 7. The case was assigned to the Special Processing Unit of the Office of Special Masters.

On August 28, 2023, Respondent filed his Rule 4(c) report in which he concedes that Petitioner is entitled to compensation in this case. Respondent's Rule 4(c) Report at 1. Respondent determined that Petitioner's alleged injury is consistent with SIRVA as defined by the Vaccine Injury Table. Specifically, Respondent found that "[P]etitioner had no history of pain, inflammation, or dysfunction of her left shoulder prior to vaccination; pain occurred within 48 hours after receipt of an intramuscular vaccination; pain was limited to the shoulder in which the vaccine was administered; and no other condition or abnormality has been identified to explain petitioner's shoulder pain." *Id.* at 4. Respondent further agrees that Petitioner suffered the residual effects of her condition for more than six months. *Id.*

In view of Respondent's position and the evidence of record, I find that Petitioner is entitled to compensation.

IT IS SO ORDERED.
